

It is a bad idea for the good of America to allow all the media to come from one supplier. It is like having to buy only kind of car, or one kind of coffee, or one kind of bread. It is saying we have a right to only one kind of thought. This is a bad idea especially when you denied the existence of micro radio. I can only believe that is your plan; one big media outlet that will tell us what to think, and I suppose who to vote for. Please don't do it. Please keep some diversity.
